

Levasil CC401

Colloidal silica

Levasil® CC401 is a neutral, aqueous dispersion of colloidal silica that is approximately 40% solids by weight. The silica dispersion is sterically stabilized and the amorphous silica particles carry a negative surface charge. The silica particles are discrete, have a smooth, spherical shape, and are present in a narrow particle size distribution. The particles have also been surface modified with an epoxy silane. "Hydroxyl number" for 2-pack systems; 0.45 mole OH/kg product." The physical appearance of the dispersion is a translucent liquid, slightly more viscous than water. Levasil® CC401 is produced for world-wide distribution.

CAS number
1239225-81-0

Specification

Density at 20°C	1.243 - 1.280 g/cm ³
SiO ₂	35.0 - 39.0 wt%
pH at 20°C	5.0 - 9.0
Viscosity at 20°C	≤25 cP

Characteristics

Ethanol	2.5 wt%
Average Particle Size, calculated	12 nm
Appearance	Free of gelatinous and foreign matter.

Notes:

Nouryon's warranty and liability for non-conforming goods / products is limited solely to the elements set out in this specific section above, under the heading "Specification". This warranty is the sole warranty given by Nouryon. The other information included in this Product Data Sheet is not covered by Nouryon's warranty, and Nouryon will have no further obligation or liability with respect thereto.

Applications

Levasil® CC401 is an optimised product with a proven performance within the coating and surface treatment area.

Storage

Levasil® CC401 should be transported and stored at a temperature of 0-40°C (32-104°F). For packaged goods, any translucent packages should be stored out of direct sunlight or bright light. Under recommended conditions, Levasil® CC401 has a shelf life of eighteen months after production.

Packaging and transport

Levasil® CC401 is available in bulk, 1000 liters IBC and 220 liters plastic drum.

Safety and handling

Before handling this material, review the corresponding Material Safety Data Sheet. Colloidal silica products are aqueous dispersions of amorphous silica. Colloidal silica is not classified as harmful, but as mildly irritating. Because the products can have a drying effect on the skin, protective gloves should always be used. In case of skin contact, wash the area of contact with plenty of water. The use of safety glasses is always recommended. In case of eye contact, rinse with large amounts of water and seek professional medical advice.

Certifications

ISO 9001 and 14001 certified.
